Stunned heart - mrqef

```
    C              Ami
1. sitting at the stairs
    Dmi             G
I'm staring at your face
   C             Ami
so beautiful and young
 Dmi                     G
tortured, I think I feel love

2. then I'm crying in my bed
wondering how to change our fate
Soon we'll be five thousand miles apart
why did we fall in love just now

Chorus:

hey girl
                  Fmaj7   C
we're like  the stars
         Dmi              G
seem so close but yet so far away
                 Fmaj7   C
and just like the stars
              Dmi             G
our love and life one day will fade away
           Fmaj7  C
and people say
               Dmi                       G
that stars are hot, but as you they just can be not
                      Fmaj7  C
and now it hurts like hell
               Fmaj7   C
cause in few dayys
                  G
you'll be so far away

3. the pain is real
when your lips are not with me
If I knew it would be so hard
cause you stole my whole heart

chorus

Bridge:

   F                        G
So hold me tight, cause I'm not alright
     F                        G
It's not easy, maybe that's what I like
        F                          G
still there's a chance, that in another life
     F                 G
our love will get, the space to shine
    F                   G
but until than, you can count on that
       F                  G
you'll always own, little piece of my heart

chorus
```

... forever so far away
