Dream on - Nazareth

(zjednodušeno)

```
ver 1
 A      D
 Dream on
          G     D
 You can hide away
             G         D           A
 There is nothing to say, so dream on
       D
 Dream on
              G     D
 Though its hard to tell
                 G     D
 Though you're fooling yourself,
       A
 dream on

  A                           G   D
 You can laugh at me because I'm crying
  A
 You can tell your friends how much
    G             D
 I begged you to stay
  A                       G       D
 You can live your fantasy without me
  A                             G      A
 But you'll never know how much I needed you

       D
 Dream on
         G        D
 Its so easy for you
                 G    D         A
 Though I'm broken in two, dream on
       D
 Dream on
          G        D
 You can never see
            G        D                  A
 What you're doing to me, so dream on

Ref:
 A                                   G   D
 You can cross your heart and still be lying
 A                                     G
 You can count the reasons why you've thrown
      D
it away
A                                G   D
 You can dream your life away without me
A                                G     D
 But you'll never know how much I needed you
A                                G   D
 You can laugh at me because I'm crying
A
 You can tell your friends how much
  G                D
 I begged you to stay
```

```
A                                G   D
 You can live your fantasy without me
A                                  G     A
 But you'll never know how much I needed you

ver 2
       D
 Dream on
  G              D
 Its so easy for you
          G          D           A
 Though I'm broken in two, dream on
       D
 Dream on
         G      D
 You can never see
 D           G     D             A
 What you're doin to me, so dream on
       D
 Dream on
           G          D
 Though its hard to tell
               G            D           A
 Though you're fooling your self, dream on
        D
 Dream on
```
