1.

 G
We're like two bodies out in space
 F
Travelling in our milky way
 C
With no fear how close we get
 G
Nor of the speed we're traveling at
 Dm
But there's this vacuum between us
C G
. . . I'd love to hear you . . .

2.

Although we'll touch, we'll never speak
and when the force is at its peak
with whatever crush we crash
We might both end up as trash
But there is sunlight now between us
. . . and I can see you . . .

3.

Wipe the dust out of your eyes
Or it will take you by surprise
That this might be the big bang
A begin of new life once again
There is gravity between us
. . . and it draws you . . .

4.

Just the thought of how it feels
And to see if it will heal
The memories flirting with my mind
Before they get lost in time
There might be nothing here between us
. . . but confusion . . .
