New days - - Filmové melodie

```
Ami                              C
Here comes the sun it's for everyone
G                     D
I wish the sky was all mine
Ami                         C
Because we came from the ocean life
G                    D
We swim like dolphins in time

F                                    C
sometimes I wish that nothing would change
             G
whatever you do, I will see you the same

C          Ami
New days, fly away
           F               G
Across the universe see you there
   C                 Ami
So blue days, and you know when we go
           F        G
Across the universe If you dare

Ami                              C
We rise and shine with our sleepy eyes
G                     D
we feel the sun on our skin
Ami                            C
And deep inside I believe the time
G                     D
Will come to hold you again

F                                    C
sometimes I wish that nothing would change
             G
whatever you do, I will see you the same

C          Ami
New days, fly away
           F               G
Across the universe see you there
   C                 Ami
So blue days, and you know when we go
           F        G
Across the universe If you dare

Emi                F               Emi
There's another New Day in your eyes
               F              Emi
Another Me and You day, if we try

C                B      F
So carry all our troubles home,
C                             F         C
```

```
lay them by the riverside and wash them away

Ami
Fly away
           F        G
Across the universe If you dare

C          Ami
New days, fly away
           F               G
Across the universe see you there
```
