Possibilities - - Filmové melodie

```
C                       G
Don't break my heart before I give it to you
Ami                     F
Don't tell me no before I ask you to
C                       G
Don't say it doesn't fit before you try it on
Ami                     F
There's too much to lose to be wrong

Ami                     F
And it feels like there's something here
C                       G
But I wanna see it before it disappears
Ami                     F
And if there's something real between me and you
C                       G
Well are we both open to

C               G        Ami
All these possibilities
F       C       G       Ami   F
So many little possibilities
F                 Ami
Right in front of us
Ami             F
Close enough to touch
                C                         G
And far enough to have some time to see

C               G         Ami
All these possibilities
F          C    G        Ami   F
Oh these possibilities
F                   Ami
Are written in the stars
Ami             F
We are who we are baby
                C                           G
And I can't help but think that possibly
                 C
There's possibility

C                       G
Don't give me hope if there's nothing to this
Ami                     F
Don't let me in if you're not there
C                       G
What I'm feeling doesn't happen every day
Ami                     F
So baby please play me fair

Ami                     F
And it feels like there's something more
C                       G
Than those crazy little crushes I've felt before
Ami                     F
When you move in closer I can feel the rush
```

```
C                       G
And now we're so close we can touch

C               G        Ami
All these possibilities
F       C       G       Ami   F
So many little possibilities
F                 Ami
Right in front of us
Ami             F
Close enough to touch
                C                        G
And far enough to have some time to see

C               G         Ami
All these possibilities
F          C    G        Ami   F
Oh these possibilities
F                   Ami
Are written in the stars
Ami             F
We are who we are baby
                C                           G
And I can't help but think that possibly
                 C
There's possibility
```
