        kytara

        C#                    D#mi
        So you face it with a smile
                         F#
        There is no need to cry
                          C#
        For a trifle´s more than this

        C#                         D#mi
        Will you still recall my name
                          F#
        and the month it all began
                               C#
        will you release me with a kiss

        C#                         D#mi
        Have I tried to draw the veil
                               F#
        If I have - how could I fail?
                                        C#
        Dit I fear the consequence?

        C#                     D#mi
        ...dazed by careless words
                   A   H  C#
        Cosy in my mind...

        C#         D#mi          F#         C#         G#

        C#                            D#mi
        Now you shaped that liquid wax
                          F#
        Fit it out with crater cracks
                        C#
        Sweet devotion my delight

C#                        D#mi
        Oh, you´re such a pretty one
                                        F#
        And the naked thrills of flesh and skin
                               C#
        would tease me through the night

        C#                         D#mi
        "Now I hate to leave you bare
                          F#
        If you need me I´ll be there
                         C#

        Don´t you ever let me down"

        And I touched your face

        Narcotic mind from lazed Mary-Jane  ><
   D#mi
        And i called your name
                                      F#
        Like an addicted to cocaine
                                    C#
        calls for the stuff he´d rather blame  ><

        Narcotic mind from lazed Mary-Jane  ><
                         D#mi
        And I called your name
