

## Take a little walk with me - McClatchy, Scott

F                    C                    G                    C  
Everything's different tough nothing's changed  
walking these streets I still feel strange  
if you want to see the things that I see  
come on and take a little walk with me.  
come on and take a little walk with me.

Intermezzo: (po každé sloce)

```

```

You turn a corner and you're caught of guard  
you thought you were tough, you thought you were hard  
You stare at something you'd forgot to see  
come on and take a little walk with me.

come on and take a little walk with me.  
I show you world you may not believe  
where beauty is in the every day you see  
come on and take a little walk with me.

I heard the rumor that the mayor of this town  
is trying to shut the firehouse down.  
He said that it's something that we don't need  
come on and take a little walk with me.  
come on and take a little walk with me.

You don't see something every day  
it doesn't mean it has gone away  
to taste, to touch, to hear, to see  
come on and take a little walk with me.  
come on and take a little walk with me.

come on and take a little walk with me.  
I show you your world that you may not believe  
where beauty is in the every day you see  
come on and take a little walk with me.  
come on and take a little walk with me.

come on and take a little walk with me.  
come on and take a little walk with me.  
come on and take a little walk with me.
