You're wrong - NOFX

```
Em    D     F#m    G

       Em                              G
You're wrong about virtues of Christianity
           D                             Hm
And you're wrong if you agree with Sean Hannity
       G5                              A5             Hm     Hm
If you think that pride is about nationality, you're wrong

       Em                              G
You're wrong when you imprison people turning tricks
           D                           Hm
And you're wrong about trickle down economics
       G5                                      A5                Hm     D
If you think that punk rock doesn't mix with politics, you're wrong

       G                        D
You're wrong for hating queers    and eating steers
A                               Hm
If you kill for the thrill of the hunt
       G                        D
You're wrong 'bout wearing fur    and not hating
        A                        Hm
Ann Coulter   Cause she's a cunted cunt

       Em                        G
You're wrong if you celebrate Columbus Day
           D                                  Hm
And You're wrong if you think there'll be a Judgement Day
   G5                             A5          Hm     Hm
If you're a charter member of the NRA, you're wrong

       Em                             G
You're wrong if you support capital punishment
           D                                  Hm
And you're wrong if you don't question your government
       G5                                    A5                 Hm     D
If you think her reproductive rights are inconsequent, you're wrong

       G                      D
You're wrong fighting Jihad,     your blind faith in God
A                           Hm
    Your religions are all flawed,
       G                      D
You're wrong about drug use,     when its not abuse
A                          F#5
    I hope you never reproduce

       G5                              D5
You're getting high on the downlow  A victim of Cointelpro
       A5                              G5
You're wrong and will probably never know
```
