

Rollin' Home - Peter, Paul and Mary

- G C
1. Truth with all it's far out schemes
D
let's time decide what it should mean
G
it's not the time but just the dreams that die
and sometimes when the room is still
Hmi
time with so much truth to kill
C G
leaves you by the window still so tied
Ami D G
without a wing to take you high
Ami D G
without a clue to tell you why.
2. Now I just want to keep my name
not bother anybody's game
without ideas of gold or fame or insane heights
I don't want a lot of money
I don't want a Playboy Bunny
just a love to call me honey late at night
in my arms by my side
in my arms late at night.
D C D
R: But I don't know I ain't been told
C D
ev'rybody wants a hand to hold
C D
they're so afraid of being old
C D
so scared of dying so unknown
Ami C G D C D
and so alone rollin' home.
3. Well I see the ones who crawl like moles
who for a front would trade their souls,
a broken mirror's the only hole for them
and for you who'd exchange yourselves
just to be somebody else,
pretending things you never felt or meant
hey you don't live what you defend
you can't give so you just bend.
4. Now if you care what people think
like they supplied some missing link
they'll just stand back and watch you sink so slow
they'll never help you to decide
they'll only take you for a ride
after which they'll try and hide the fact that they don't know
what you should do where you should go
what you should do where you should go.
- R:
5. There's nothing big I want to prove
no mountains that I need to move
or even claim what's right or true for you
my sights my songs are slightly charred
you might think they miss their mark
but things are only what they are and nothing new
but for me I think they'll do
but for me I think they'll do.
6. Well I can see a king and queen

a beggar falling at my feet
they all must see the same sad dreams at night
futility and senseless war
pit the rich against the poor
while cause is buried long before the fight
for what was wrong for what was right
it's just the strong who ever says what's right.
