

Party - Queen

We had a good night jamming away
There was a full moon showing
And we wanted to play
But in the cold light of day next morning
Party was over uh uh
The party was over
We got love and we got style
And we got sex and I know I know we got what it takes
Oh oh oh oh oh - oh oh oh
Why don't you come back and play
Come back and play (hey hey) come back and play
We got all night all day
Everybody's gone away
Why don't you come back and play come back and play
Come back and play come back and play
Play play it play it
Go get 'em boy - let's party
Yeah
Give it give it

We had a food fight in somebody's face
We were up all night singing (singing)
And giving a chase
But in the cold light of day next morning
Everybody was hung over
Hey come back and play (come back and play) come back and play
We got all night all day
Everybody's gone away
Why don't you come back and play (and play) come back and play
We got all night we got all day
We got all night to play
Come back come back come back come back back and play
Hey hey hey
Goodbye goodbye goodbye goodbye the party is over
