Make you feel better - Red hot chilli peppers

She's the one she's the only one
She´s got ripped back light
Gonna make me come
I say... when I smile I'm a really smile
I got dreams so wide like a country mile

I say now I´ll take it
It's better for you
Somehow we´ll make it
Cause that´s what we do.

Pick a star in the open sky
I see you see me
And that is why I

Hop along to the cowboy beat
When I fell your fire
Jump up to meet.

I say now I´ll take it
It's better for you
Somehow we´ll make it
Cause that´s what we do.

Something out there
Where love is your only friend and
We are the ones
That will make you feel better and
Someone to spare
When love is the only end and
We are the ones
That will make you feel better
(Oh Yeah!)

In a world that has run amok
I've got to set my sights
Just to get struck.

I walk away from the rank and file
With a punched out mouth
And a pack of style

I say... she´s the one, she is the only one
Makes me search myself
Until I´m done... and

Tell me now in a telegram
Do the sea of stars
Make a diagram... and

Something out there
Where love is your only friend and
We are the ones
That will make you feel better and
Someone to spare
When love is the only end and
We are the ones
That will make you feel better

OOOhhhh yeeahhh!!!
Heeelll Yeeaahhh!!!
Oh Yeah!

So alive I arrive on dust
You can search my mind
for the red on rust... I said
Take me there and she really cares
Lights up for me gonna hear my prayers
I said

I say now I´ll take it
It's better for you
Somehow we´ll make it
Cause that´s what we do.

Something out there
Where love is your only friend and
We are the ones
That will make you feel better and
Someone to spare
When love is the only end and
We are the ones
That will make you feel better

We are the ones that will make you feel better
We are the ones that will make you feel better
We are the ones that will make you feel better and
We are the ones that will make you feel better
Now...
